-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 July 2001.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a method for creating a network configuration including separating demands into low degree and high degree of separation, classified in class 709, subclass 220 (network computer configuration).
 - II. Claims 12-14, drawn to a method for creating a network configuration, including routing based on separating demands into groups based on their shortest path and maximum cycle size, classified in class 370, subclass 395.42.
 - III. Claims 15-30, drawn to a programmable apparatus for creating a network configuration, classified in class 709, subclass 220.
 - IV. Claims 31-42, drawn to a computer readable memory for causing a computer to create a network configuration, including routing based on separating demands into groups based on their shortest path and maximum cycle size, classified in class 370, subclass 395.42.
 - V. Claims 43-44, drawn to a computer implemented process to create a network configuration given demands, including routing based on separating demands into groups based on their shortest path and maximum cycle size, classified in class 370, subclass 395.42.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-III and II-IV-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to

Art Unit: 2182

be separately usable. In the instant case, invention II-IV-V has separate utility such as a method for creating a network configuration for low degree of separation demand, including routing based on separating demands into groups based on their shortest path and maximum cycle size. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Groups I-III is not required for Group II-IV-V, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angel L Casiano whose telephone number is 571-272-4142. The examiner can normally be reached on 9:00-5:00 pm.
